

Ref: nCoV-111

To: **All Students**

From: Registry

Date: 15 March 2022

Subject: **Reporting System for Recovery of Students from COVID-19**

Dear Students,

We hope this email finds you safe and well.

As mentioned in the previous COVID-19 circular (nCoV-103 Updated Learning & Teaching Arrangements for Semester 2 of the 2021-22 Academic Year), **if you are tested positive** using either Covid-19 Rapid Antigen Test (RAT) or nucleic acid test, you are required to **submit proof of a negative test result before re-entry onto campus premises**. Pursuant to the latest government policy on the anti-epidemic measures, with immediate effect from 9 March 2022, you are now **allowed to submit either your negative test result obtained from a nucleic acid test or from a RAT**.

Recovery cases who have received at least two doses of COVID-19 vaccines

If you have received at least two doses of COVID-19 vaccines, you may **conduct RATs on Day 6* and Day 7* or any 2 consecutive days after Day 7*** of the mandatory quarantine period. If the RATs on these two successive days were negative, please retain and **upload your RAT negative result photos of the above-mentioned days to the link of our institute below** to update us on your recovery. This process is important for us to maintain up-to-date information for the relevant parties' reference; your negative results must also be reported via the system below before your re-entry to campus.

Recovery cases who have not been vaccinated or have only received one dose of COVID-19 vaccine

If you have not been vaccinated or have only received one dose of COVID-19 vaccine, you are required to undergo 14 days quarantine and medical surveillance. You have to **conduct RAT on the Day 14* of your quarantine period and upload your RAT negative result photo of the above-mentioned day to the link below** to update us on your recovery. This process is important for us to maintain up-to-date information for the relevant parties' reference; your negative results must also be reported via the system below before your re-entry to campus.

Alternatively, **if you are required to undergo compulsory COVID-19 nucleic acid test at Community Testing Centre (CTC) on Day 12***, please retain and **upload the SMS notification containing the result of the Day 12* test at CTC to the link below**.

Reporting System of Negative Covid-19 Test Result

Please submit either your negative test result obtained from a nucleic acid test or from a RAT via upload your result on our website, details as follows:

<https://liveciheedu.sharepoint.com/sites/Registry/SitePages/Report-on-COVID-19-Case---Recovery-for-Students.aspx>

CIHE and CBCC will continue to monitor closely the development of the COVID-19 pandemic. Timely update of necessary measures will be announced whenever necessary.

With best wishes,

Registry

Remarks:

* The day following your testing or collection of the positive sample is counted as Day 1 of your mandatory quarantine. If there is no such testing or collection record, the day on receiving of your positive result is counted as Day 1.
